Yes 7 No 3 Report Average Rating 3.0 out of 5 stars 22 ratings, based on 22 reviews Good for the value June 4, 2014 Verified purchase We purchased this product about a month ago for our toddler to use on our recent plane trip. Item worked pretty well but only had about 3 hours of battery life. We used it in our room while on vacation and noticed it was a little noisy. The quality of the video isnt great compared to what is out today. One thing I wish it has was a way to show battery life. Overall, its not bad for the cost. It's only a few. I hooked it up to my hi definition television, and put a hi def dvd in it. It loads for about ten minutes then says that there is no disc in the dvd player. I believe the. It is completely dead. I haven't used this in dvd in a long time not even sure if that is what it is. What's wrong Not on mute. The link below is a short youtube video showing. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. See All Buying Options Add to Wish List Disabling it will result in some disabled or missing features. You can still see all customer reviews for the product. I wanted a player that I could watch movies at night before I go to sleep. I like to lay in bed and watch tv or movies, but I need my glasses to view anything too distant. This worked out just great. I can see the screen and adjust everything either through the remote or on the player itself and I can lay down without my glasses and enjoy a movie. Fully charged, it will play for about 5 hours. It is extremely easy to set up and the initial charge was finished in less than 5 hours as opposed to 12 hours in the instruction book. It came with a headphone jack, car charger and remote. It also has a USB port which I have not yet used. The screen swivels and it has builtin speakers and a rechargeable battery. The screen is large enough but there is a zoom function that can be used while viewing the dvd. So far, the pictures on the screen look nice and clear, the sound quality is good and it is just what I was looking for. At first I could not get the batteries to stay charged, but it seems to have fixed itself after being plugged in for 2 days. Please try again later. From the United States Please try again later. Please try again later. Ronald A. Buffo 5.

0 out of 5 stars My Grandson uses this when his Mom is exercising or when he is traveling long distances in the car or airplane. Please try again later. Please try again later. DaisyLou111 1.0 out of 5 stars We wanted a dual screen with a battery so it would save the kids place on the DVD when we turned the car off, and there are only a couple brands out there that fit the bill. Don't buy this one. Pros Dual screen with a battery, easy to reach buttons on the front, average picture quality CONS 1 power cord is WAY TOO SHORT. It's about 4.5 ft which would just barely reach if you have it in a sedan. We had the boys in the third row of the mini van with a plug right behind them in the trunk area and it totally wouldn't reach. Tried it in the middle going to the front, nope, still not enough

cord. No Velcro, just an adjustable strap which doesn't stay tightened down well and is constantly loosening and letting the screens fall. 5 Strap attachments. total manufacturing fail. Like I mentioned, no Velcro, just a belt-type strap you have to pull the loose end to tighten down. and well, wouldn't you know it, the skinny little plastic pathway the strap runs through on the back of the screen broke when tightening down the straps. And we were not pulling too hard at all, just barely enough to keep it from slipping off the head rest. And not just one broke, both on one screen and one on the other. so now we can't even attach it to the head rest. Please try again later. Please try again later. I bought this equipment for our kids to use in the car while we were on a 2 week summer road trip. It was more trouble than it was worth. 1 The battery doesn't hold a 5 hour charge, as stated in the manufacturer's description. After charging overnight, the kids could not get through a 90 minute movie without LOW BATTERY warning. 2 Common sense tells you that the included car charger would come in handy during times like that. Nope.

I'm still curious about why it came with a car charger, since you can't watch a dvd while it is charging. Defeats the purpose of a portable dvd player for the car that you can plug in and charge, but can't watch or one that you can watch, but can't plug in or charge. 3 When the players did work 1st thing in the am after charging all night, the machines would give terrible feedback if the AV cable was touched or moved in any way. 4 If it functioned as it was supposed to, I would most likely have been able to overlook the 2 useless straps that were supposed to hold the machines onto the front headrests. The straps were a joke. They are plastic pathways to pass the straps through. May have worked if the fabric of the straps was not cheap, super thin and limp. 5 Adding insult to injury. I am bilingual, so while my daughter was reading the instructions in English, I read the Spanish version. They may as well have been manuals to 2 different machines. The Spanish version had nothing to do with what was being presented in the English version. Not only were there entirely different topics, but the translation was terribly basic. Please try again later. Please try again later. mossy 3.0 out of 5 stars Still can't see it really well but it works well in every other aspect. Please try again later. Please try again later. Symone 5.0 out of 5 stars I've been searching high and low for a DVD player I could use in my SUV for when my child was having a particularly hard time or for long road trips. This DVD player is perfect so far. I've only used it for the past couple of days so if anything changes, I'll update my review. I don't want to have to pull over and climb in the back seat to flip the switch on at the player. Simple things and yet so hard to find a player that fit the bill until now. Here's what I did. I got an extra long ac cord to plug the player in my plug is located in the center console of my SUV and got a cool DVD holder that I attached to the back seat headrest.

My child is rear facing, so when I want to turn a show on for her, I reach into the center console, plug in the player, grab the remote, and hit the power button and it turns on. It seems simple but no other player I found would do this. When we reach our destination, I grab the remote and hit stop, then the power button and unplug the player. So awesome!! The player isn't the fanciest player out there but it totally works for my purposes and I'm thrilled. Hope this player helps some other parents out there. Please try again later. Please try again later. Christina McCrary 2.0 out of 5 stars Refund was processed promptly. Please try again later. Please try again later. Please try again later. Cynthia A 4.0 out of 5 stars It makes a racket when spinning up and running, but it's not a problem for the person with the earbuds; the controls on the deck are amazingly cheap plastic, but working. It arrived in one piece, well-packed and within the time frame, so that brought it up to a 4. Given the price, I expected a little better, but overall it's ok. I don't expect it to live as long as the one it replaced, but hope that with gentle use it will last a while. Please try again later. Please try again later. Jessica 1.0 out of 5 stars We tried over and over and the same thing kept happening. Please try again later. Please try again later.
