Warranty repair or replacement shall not extend the original warranty period of the Product. A dated

proof of purchase is required at the time of warranty service. A copy of your dated bill of sale will satisfy this requirement. This warranty does not cover any accessories, or any consumables, such as paper or ink cartridges, as to which there shall be no warranty or replacement. Repairs of such Canon brand peripheral equipment shall be governed by the terms of the Separate Warranty. The sole warranty, if any, with respect to such nonCanon brand items is given by the manufacturer or producer thereof. If the problem cannot be corrected over the telephone, and you elect the InstantExchange option, a reference number will be issued to you. You will be asked for the Product serial number and other information pertaining to your Product and for a ship — to location for the replacement Product must include street address. The Canon USA repair facility will ship out the replacement Product prepaid by Canon USA. After receipt of the replacement Product with instructions and a prepaid waybill, follow the enclosed instructions on how to ship your product to the Canon USA repair facility. Your Product must be returned in the shipping carton in which the replacement Product was packed and include the reference number, A COPY OF YOUR DATED PROOF OF PURCHASE BILL OF SALE, and a complete explanation of the problem. Canon USA does not guarantee same day shipment in the event of the occurrence of factors beyond its reasonable control. The replacement Product you receive may be a refurbished or reconditioned unit and will be covered for the balance of the period remaining on your original limited warranty.

InstantExchange warranty service is subject to the availability of refurbished or new replacement units. Canon U.S.A., Inc. Reload to refresh your session. This is Canon iP100 Service Manual as used by official service technician to maintain and repair the Canon iP100 inkjet printer. This manual has been issued by Canon Inc., to provide the service technicians of this product with the information necessary for qualified persons to learn technical theory, installation, maintenance, and repair of products. Thank you, for helping us keep this platform clean. The editors will have a look at it as soon as possible. It only takes a minute to sign up. I did install CUPS, but didnt try installing any drivers. It has to be some kind of software error. In order to select your printer and send a print job to it, a driver had to be set up. If CUPS already has a driver, you still need to identify the printer to get it into your list of available printers. A different printer driver could have been selected, in which case the output could be corrupted or it might not print. However, that shouldnt damage the printer. Disconnect the printer from the computer, unplug the printer from the wall, and let it sit a few minutes. Then plug it back into power and try the selftest. I had the printer disconnected from power for an hour but it still turned on into the same state.

Shut the printer off, disconnect it from the computer, unplug it from power for a few minutes, then, while still disconnected from the computer, plug it in and run the self test. However, regardless of number of times I pushed the button it always went back to greenorange flashing. If it is something you can diagnose and fix yourself, it will be in there. If you cant correct it with the guidance in the service manual, contact Canon tech support. If the printer is new, I would consider just exchanging it. If its still under warranty, Canon should fix or replace it. These printers cannot be used without their own specific driver. Without a driver, I suspect the CUPS test print would be sent to the printer as PostScript, which the Pixma does not understand. So, switch off, clear the queue and switch back on. That should let the printer power up correctly, unless it does indeed have a hardware error. Eleven flashes is a failure during automatic printhead alignment If the items listed dont fix the problem, I would contact Canon tech support. It contains a lot of information and procedures that may be helpful. The problem seems to be confusing the error reporting parts of the printer or something since I doubt its the printer head alignment and that error doesnt go away after performing the described procedure. Please be sure to answer the question. Provide details and share your research. Making statements based on opinion; back them up with references or personal experience. To learn more, see our tips on writing great answers. Browse other questions tagged printing printer ubuntu14.04 canonpixma or ask your own question. What are the downsides For a better experience, please enable JavaScript in your browser before proceeding. It may not display this or other websites correctly. You should upgrade or use an alternative browser. Ive read the service manual but it doesnt tell you what to do after removing the side and top panels.

Ive also looked at Neil Slades website and am still none the wiser. If anyone can provide idiotproof instructions it would be much appreciated. It is found here. Druckerchannel.de has an excellent article about changing the ink absorbers in the iP4200 and the iP5200. This article is in German, but you could use Google Translate if you dont read German. Link to the article here or a Google translation The Google translation is not perfect, but comparing to the article about changing ink

absorbers in the iP4000, which is also available in English might be helpful The iP5200r is mechanically very similar to the iP5200 so the instructions are also suitable for the iP5200r. Could you also to avoid double posting please delete your post in the other thread Good luck with the project. Peter. I have made similar beginners errors myself. Register now Pro 10s replacement.
